Agenda Items	Decision	Deadline/ Time allotted
Current file detection and monitoring system was weak, hence raising the need for a new one.	Use of Guassian NB classifer.	1st October 2017
Question of how to detect suspicious files?	Use of five classification algorithms.	20th October 2017
Correction of prototype failure to detect harmful .exe.	Debugging process.	27th October 2017
Calculation of code metrics.	Use of pylint and lizard to calculate code metrics.	29th October 2017

We further discussed details over telephonic conversations throughout the months of October and November, in addition to a few emails.

To,

Yash Saxena & team,

NIIT UNIVERSITY

Subject:- Response in correspondence for Anti-Virus System market application.

We read through the details of the specifications and the structure you sent us. We have a few things we wanted to discuss mainly concerning the task management and size structure. We'd like to meet and align our track of ideas. Let us now know your further decisions.

Regards,

Shashi Patel

Director
